Search and Results
Starting Your SEARCH

Type your search terms in the Search Bar, which can be key words, company names, or authors’ names.

1. The SEARCH BAR appears towards the top of every page.

TIP: To see more search options quickly, run a search without any search terms.

Searches retrieve results if they are found in a headline or article text. Searches do not search within tags—use filters to restrict results based on tags.

2. TIP: To focus your search, you can restrict your search to headlines only.

View our SEARCH TIPS, which can be found on any search results page, to ensure you get the most of your searches.

3. There are 10 ways to filter your search results to narrow them down and target your result set to your needs. Filter your results by any combination of: Publication, Industry, Subject, Therapy Area, Device Market Area, Date, Company, Region, Content Type and Media Type.
Search Rules and Techniques: Boolean Search

You can use the Boolean operators AND, OR, NOT to include or exclude results from your search. You can also use parentheses to create nested Boolean searches.

**EXAMPLES:**

- **Pfizer AND Merck** finds articles containing both Pfizer and Merck.
- **Pfizer OR Merck** finds articles containing either Pfizer or Merck.
- **Pfizer NOT Merck** finds articles containing Pfizer, that do not also contain Merck.
- **Pfizer AND (Novartis OR Merck)** finds results containing Novartis and Pfizer, Merck and Pfizer, or all three.
Search Rules and Techniques: Exact Matches

By default, stemming is applied to your search terms to automatically search for word variants. This means that typing the search term `develop` might also find `developer`. To search for an exact match, enclose your search terms in quotes.

1. Searching for “generic drug” will retrieve only results containing that exact phrase.

2. Searching for `generic drug` will find results containing `generic` and `drug`, but might be separated by other words, or, as a result of stemming the results might contain words with the same stem, such as `generics` or `general`.

3. You may also use Boolean operators between separate quoted terms. If you want to find all articles containing the exact words “generic” and “drug”, but not necessarily adjacent to each other or in that order, you can search for “generic” AND “drug”.

Search Rules and Techniques: Wildcards

Using an asterisk (*) at the beginning, middle or end of a word or part of a word will allow you to find matches that include additional letters, as represented by the asterisk.

1. Searching for gen* finds articles containing general, gender etc.

2. Searching for *gen finds articles containing Amgen, oxygen, etc.

3. Searching for gen*ic finds articles containing genetic, generic etc.
Customizing Your Results: Sort and Display Options

You have several options to change the search result display.

1. Turn on VIEW HEADLINES ONLY for a more condensed display feature.

2. Sort by Date or Relevance, ascending or descending.

3. Scroll to the bottom of the page to select the number of results per page and navigate to the next page.
Customizing Your Results: Facets and Filtering

What you see is up to you. The search functions across all of our publications – showing the full breadth of content we offer on any given search parameters. Or, you can limit your search to just the publications you subscribe to, or the subject area, region, date range or media type you need.

1. **TIP:** Click Select My Subscriptions to view only the publications you subscribe to.

Your most recently selected publications are maintained for your next search. To search all publications, tick the box for each publications or use the Clear All feature.

2. **TIP:** Selecting more than one choice within the Subject, Therapy Area, Device Market Area or Region facet retrieves all articles tagged with *any* of the choices. For example, selecting U.S. and Canada displays articles containing either the U.S. tag, Canada tag, or both tags.

Selecting tags in multiple facets retrieves articles that are tagged with at least one selection from the facet. For example, selecting Regulation and Asia Pacific displays articles containing both the Regulation and the Asia Pacific tag.
Customizing Your Results: Facets and Filtering

More tips for using facets and filtering to find only the results you need.

1. You can click on the calendar icon or enter dates to select a date range. If you are entering a date range, be sure to use day/month/year format. For example, enter January 15, 2020 as 15/01/2020.

2. To use the Companies Filter, start typing the company name to choose it from the list. You may see fewer results than searching for a company name by keyword, because a story is not tagged with a company name if the company is simply mentioned in passing.

3. To limit your results to podcasts, videos or other multimedia, use the Media Type filter.
Saving and Sharing

Save your search to run again later, turn it into an RSS feed, or share it with a colleague via email. You can also bookmark articles from the results page.

1. Fill out a simple form to email a list of your results to someone else—or yourself.

2. Set up an RSS feed based on your search criteria.

3. Save your search to run again later, or turn it into a custom email alert so you are automatically notified whenever new content meeting those search parameters is published. Go to My Account to view your results again.

4. Bookmark an article for future reference directly from the result list.
