

Import Alert 54-17

1

[FDA Home](#)³ [Import Program](#)⁴ [Import Alerts](#) [Imports Alerts by Number](#) Import Alert

(Note: This import alert represents the Agency's current guidance to FDA field personnel regarding the manufacturer(s) and/or products(s) at issue. It does not create or confer any rights for or on any person, and does not operate to bind FDA or the public).

Import Alert # 54-17

Published Date: 02/16/2016

Type: DWPE

Import Alert Name:

DETENTION WITHOUT PHYSICAL EXAMINATION OF DIETARY SUPPLEMENTS DUE TO LEAD, ARSENIC, MERCURY, AND/OR CADMIUM CONTAMINATION

Reason for Alert:

As part of its responsibilities for ensuring the safety of the U.S. food supply, the Food and Drug Administration (FDA) monitors levels of certain toxic elements in foods. FDA uses this information to estimate dietary exposure to these contaminants and to identify the relative contributions of these foods to total toxic element exposure.

In 2015, FDA was notified of a New York City (NYC) embargo based on New York City Department of Health and Mental Hygiene (NYCDOHMH) test results indicating that 20 Ayurvedic supplement products from a manufacturer in India contained high levels of mercury, arsenic, and/or lead. These products were in tablet form and bottle size varied from 40-80 tablets each. FDA subsequently collected samples of 10 products from the same manufacturer, which FDA analyzed and confirmed to contain high levels of mercury and/or lead. FDA concluded that consumption of any one of the 10 Ayurvedic dietary supplements may be injurious to health from either mercury exposure, lead exposure, or both.

This import alert has been developed for dietary supplement products that have been imported or offered for import into the United States that contain levels of heavy metals that may render the product injurious to health and have met the criteria for detention without physical examination as established in FDA's Regulatory Procedures Manual (RPM) Chapter 9-6. In making a determination as to whether the amount of lead, arsenic, mercury, and/or cadmium in a dietary supplement product may render that product injurious to health, FDA conducts an assessment of potential health hazards based on factors such as the quantity of the toxic element(s) (e.g., lead, cadmium, inorganic arsenic, and mercury) found in the dietary supplement(s) and consumption levels of the product.

Guidance:

Districts may detain without physical examination shipments of dietary supplements from the firms identified on the Red List of this Alert. Recommendations for detention without physical examination should be forwarded to the Division of Import Operations (DIO). DIO and FDA's Center for Food Safety and Applied Nutrition (CFSAN) will evaluate regulatory packages on a case-by-case basis.

Release of Articles Subject to Detention without Physical Examination under This Import Alert:

In order to secure release of an entry that has been detained, the owner, consignee, and/or another responsible party to the shipment should provide results of a third-party laboratory analysis of a representative sample of the shipment, which verifies the product does not contain levels of heavy metal(s) that may render it injurious to health.

Proper sampling and analytical records should be submitted to the appropriate FDA District compliance office for consideration per the notice of detention. All analytical findings should be submitted to FDA regardless of the final results. For further information regarding private laboratory analyses, please reference FDA's ORA Lab Manual, volume III, section 7. Following receipt and review of private laboratory results, the FDA may, at its discretion, collect and analyze audit samples before rendering a final decision on the admissibility of the article.

Removal from Detention without Physical Examination for firms subject to this Import Alert:

A firm wishing to be removed from detention without physical examination should provide information to FDA that adequately demonstrates that the firm has resolved the conditions that gave rise to the appearance of the violation, so that the agency will have confidence that future entries will be in compliance with applicable regulations.

For additional guidance on removal from detention without physical examination, refer to FDA's Regulatory Procedures Manual, Chapter 9, Section 9-6, "Detention without Physical Examination (DWPE)."

If a firm and/or a representative thereof wish to request removal from detention without physical examination under this Import Alert, all relevant information supporting the request should be forward to the following address:

Food and Drug Administration
Division of Import Operations
12420 Parklawn Drive, ELEM-3109

Rockville, MD 20857

Or, be sent via email: Importalerts2@fda.hhs.gov

Requests for removal from detention without physical examination will be reviewed by the subject matter experts within the Division of Import Operations (DIO) and referred to the Office of Compliance, Division of Enforcement, CFSAN for additional subject matter expert evaluation within CFSAN.

Questions or issues involving import operations should be addressed to ORA/Division of Import Operations at (301) 796-0356 or fdaimportinquiry@fda.hhs.gov

For questions or issues involving OASIS or PREDICT screening, contact DCS's Import Compliance Systems Branch at ORAHQOEIODCSIMPCOMPLSYSBR@fda.hhs.gov

Questions or issues concerning science policy, analysis, preparation, or analytical methodology, should be addressed to ORA/Office of Regulatory Science at (301) 796-6600 or orahqorsmanagement@fda.hhs.gov

Questions or issues on policy, sample collection recommendations, or any other additional questions should be addressed to CFSAN/OC/DE/ Labeling and Dietary Supplement Compliance Branch at (240) 402-0315 or CFSANenforcement@fda.hhs.gov

Product Description:

Product: Dietary Supplements

Product Code: 54[][][][]

Problem: Heavy Metal Contamination

Charge:

"The article is subject to refusal of admission to Section 801(a)(3) in that it appears to contain a poisonous or deleterious substance, which may render it injurious to health. [Adulteration, Section 402(a)(1)]"

OASIS charge code ♦ POISONOUS

List of firms and their products subject to Detention without Physical Examination (DWPE) under this Import Alert (a.k.a Red List)
